Under letting No. 9048, 5 bids; 9049, 3; 9050, 3; 9051, 2; 9052, 3; 9053, 7, and 9054, 4.

Under letting No. 9048, bids Nos. 3 and 7 were rejected.

Under letting No. 9052, bid No. 3 was rejected.

All bids not acted on by the Board were referred to the Committee on Water Department.

The following communication from the Park Commissioner was read and a copy ordered sent to the Louisiana Exposition Company:

April 30, 1908.

Honorable Board of Public Improvements:

Gentlemen—I return herewith communication dated March 28, 1908, received from the Louisiana Purchase Exposition Company, said communication being a reply to report of March 17, 1908, of the undersigned, which was forwarded to the Exposition Company, giving detailed report covering the work of restoration of that part of Forest Park occupied by the World's Fair. The communication above referred to, signed by Mr. David R. Francis, president of the Louisiana Purchase Exposition Company, advises that the Exposition Company is prepared to do much of the work suggested by this department in its report of date March 17, 1908. The following points are again referred to, however:

No. 5. The existence of the cement-testing plant.

No. 7. Gardener's house, south of Art Building, will be accepted by the city, to be used by the city for such purposes as it deems best.

The city will be glad to accept all road materials, including cinders, broken concrete, gravel and gumbo.

No. 25. To the west of the Jerusalem site is an area of several hundred feet neither filled nor leveled, and a considerably larger area with much of its surface covered with pieces of rock.

The department feels that some grading is necessary in the bed of the lagoon parallel to the River des Peres, the sides of which have been sloped in a more or less irregular manner.

LAKES:

The grand basin is entirely too formal in its lines, besides being nearly straight and not in harmony with the long, rambling reaches. It is suggested that a sufficient number of the large trees be transplanted, thereby permitting the breaking up of the formal line of the basin, thus producing an effect in harmony with the general scheme for the chain of lakes.

It is agreeable to the department to re-tain road 34A, in place of 34, as suggested

by the Director of Restoration, providing the steep decline to 34A at the base of the hill be lessened and proper connection made with the main drives in the north-western part of the park.

The plans on file for bridges indicate that they are but of temporary construction, and it is felt inadvisable to accept them, as it is believed that nothing but permanent structures should go in.

No. 47. The department feels this roadway should be removed, as it is not considered advisable at this time to have many entrances from Skinker road into the park.

PLANTING:

The department feels that the regular rows of trees in the lower plain should be broken up.

The report of President Francis makes no reference to the Art building. This building, remaining in the park under the amended plan of restoration, becomes the absolute property of the city, to be dealt with as to the city seems best, upon the city accepting from the Exposition Company that portion of Forest Park which was used by it during the World's Fair.

No reference was made either to the claim of the city for sewers, drains, conduits, water pipes, and fixtures, in respect to which there is now a suit pending be-

tween the city and the Chicago House Wrecking Company. Attention is called to these matters because complete restoration under the provisions of the ordinance, and the action of the board in accordance therewith, cannot be had with these matters left open.

Surface drains for roadways are again referred to, as they are of but temporary wooden-box construction. The plans of the sewer and water system should be filed with the city.

With the exception of the above matters, it is agreeable to the department that the work to be done as recommended by the Director of Restoration be early performed, and that the proposed monumental entrance which the Exposition Company offers to erect as a voluntary contribution to the embellishment of the park, and as a lasting memorial of the great Exposition of 1904, be accepted with the grateful thanks of the city. It is urged that the proposed work be started at an early date and prosecuted to final completion.

Respectfully yours,

(Signed)

PHILIP P. SCANLAN,

Park Commissioner.

Upon recommendation of the Committee on Water Department, all bids under letting No. 9115, were rejected and the following opinion from the City Counselor was ordered spread upon the records:

(COPY.)

August 6th, 1908.

Hon. Rolla Wells, Mayor, St. Louis.

Dear Sir—I am in receipt of the following communication from Hon. A. J. O'Reilly, President of the Board of Public Improvements:

"The question has been raised relative to the intent and meaning of the law

regulating deposits to be made with proposals for public work. The law as it has heretofore been understood requires that a certified check payable to the order of the City Treasurer be deposited with each bid and enclosed in the envelope at the time the bids are opened. Heretofore bids have been received and several contracts awarded when accompanied by a cashier's check payable to the order of blank for the amount required as a deposit and blank has endorsed the same on the back of the check "Pay to the order of the City Treasurer," or words to the same effect and signed by blank, blank being the party bidding.

"A few days ago a bid was opened in which was a check or draft drawn by the cashier of the Farmers' Deposit National Bank of Pittsburgh and payable to the order of Pittsburg Valve, Foundry & Construction Co., for \$240.00, through the Third National Bank, St. Louis, Mo. This check or draft is endorsed "Pay to the order of the Treasurer of the City of St. Louis, Pittsburg Valve, Foundry & Construction Co., C. A. Anderson, Treasurer."

"You are respectfully requested to give your opinion as to whether the deposits made in each of the cases above cited are legal and in accordance with the law regulating the making of deposits with bids."

The charter provision which governs in the matter of checks referred to in the President's letter is as follows:

"All bids for the doing of public work shall be accompanied with a certified check on some bank or trust company in the City of St. Louis, payable to the order of the Treasurer of the City of St. Louis for the amount of the deposit required, enclosed in the sealed envelope enclosing the bid." Charter, Art. VI., Sec. 27.

It is apparent from reading the charter provision, and comparing the same with the description of the checks referred to in the President's letter, that those checks do not meet the requirements of the charter. The language of the charter is clear and but little can be said, except to compare the same with the checks in question.

If, however, the purpose of the charter provision is sought, it manifestly is this: It subjects the City to no risk with respect to any other party than the bank or trust company in St. Louis. In other words, in lieu of requiring the deposit of legal tender money, the charter authorized the City to take the risk of the bank or trust company in St. Louis, but no other risk of any other party as a party to said check.

Respectfully,

(Signed): CHAS. W. BATES,

City Counselor.

Action of the Supervisor of City Light-

ing, in relation to permits issued, for wire placing, conduit work and pole line construction, was approved.

Vouchers and requisitions were approved, petitions and communications re-

ferred to their respective departments.
